

SWEDISH WEAVING

PILLOW TOP

This kit contains all materials and instructions to complete a 14" x 14" pillow top. Backing and pillow form are not included.

INSTRUCTIONS

1. Find center of place mat by folding fabric in half lengthwise and widthwise. Put a pin in the center **VERTICAL** weave. 
2. Pin addition sections before weaving. From center pin, count down 45 rows and right 7 rows. Place pin in vertical weave. From center count up 45 rows and right 7 rows. Place pin in vertical weave. These are the starting points for each section.
3. Cut a piece of yarn the length and color indicated on the design pattern on the reverse side of this sheet. Length of yarn necessary is underlined.
4. Starting at the middle pin, weave yarn through all the vertical threads. Do not go through the horizontal threads. Pull yarn only half way through leaving the other half free. When complete with first side, flip piece and complete other side.
5. Complete remaining rows following the pattern. Flip piece and repeat rows 2-7. This section will create the "shadow" of the pattern.
6. Repeat pattern at the remaining two pins. These sections will not have a "shadow."
7. When complete, trim all yarn to same length as the fringe and secure yarn with a small row of machine stitching.
8. For backing: cut a piece of cotton fabric 15" x 15". Turn edges under 1/4". Stitch to pillow top so right sides are facing out. Leave one side open. Cover pillow form and stitch remaining side closed.
